

CommonCore

Author: Amlal El Mahrouss @ Ne.app

What? **Common**Core?

An overview of the architecture

CommonCore

The architecture consists of the CommonHostLayer, and Subsystems.

CommonCore

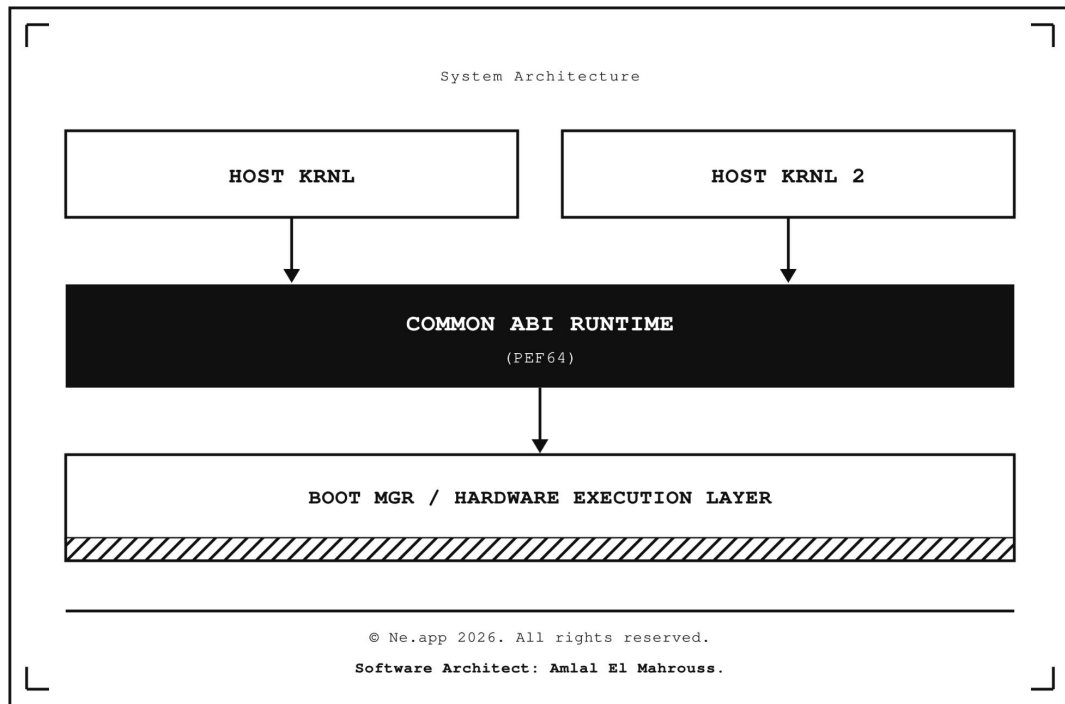

The Common Host Layer:

An Architecture implemented in NeAnt and Ant offerings by Ne.app to guarantee a common and stable system base for users and enterprises.

All while maintaining different codebases.

The BootMgr ABI shall be applied, for Ne.app we have a COFF based or Ne.app PEF based image.
